

JEREMY GREENBERG

comedian-writer-actor

When Jeremy Greenberg hits the stage the audience would be well advised to forget what they know about life as they know it, and brace themselves for a multidimensional comic world that spans the simple and stupid, the sophisticated and smart, the sexual, and the spiritual realms of human existence. In one evening Jeremy will do everything from make observations about things that don't exist, rant wildly about things that do, and talk freely with all his close personal demons, all while hitting punch line after punch line of unique hilarious material on almost every topic under the sun.
